

FIN FUN MERMAID JACK-O-LANTERN TEMPLATE

We highly recommend you use a pumpkin carving set that includes a punch and small saw that will make this project much safer and easier. Most of these kits are under \$5 and can be purchased in nearly any store that sells Halloween items. Print out the mermaid image with your printer onto an 8x11 piece of paper, then tape the paper to the pumpkin positioning the mermaid where you want her to be. Use the punch (or a toothpick) to make small dots through the paper and around the image of the mermaid. This will leave a nice set of dots you can then cut with your small saw. Please be careful and be sure to do this under adult supervision. Given some of the small, intricate corners we don't recommend knives to do this fun activity. Have a great time!

We Want to See How You Did!
