

PHOTOGRAPH OUR TEMPLATE

For best results, use only **OUR** template in the correct mermaid tail size.

NO SCANS

AVOID SHADOWS

Ensure your image does not contain shadows! Avoid wrinkly paper and phone shadows that cause a dark image to appear over your design.

ENSURE HIGH RESOLUTION

Use your smartphone to get the best image. Photos above 6MP or minimum 800 x 1000 pixels are preferred.

CHECK LIGHTING

Photograph in natural light for best results, without the flash.

STEADY HANDS

Easy does it! Get close and hold very still while taking your picture for best results. Avoid blurry photos!

GET UP CLOSE

Confirm the template is close enough to your camera without cropping any of it from view.
